

## Mad Science Virtual Birthday Parties

**\$265: up to 30 devices**

**Up to 30 kids**

**Streamed LIVE on Zoom (Can be recorded upon request)**

**Choice of multiple Themes and Add-ons**

### **Birthday Party Themes**

#### **Freaky Lab (ages 5-12)**

Join our Mad Scientist who is locked in our Freaky Lab and discover all the fizzing, booming and sparkling experiments specially conducted for your birthday! This party is a Mad Mix of chemistry and physics filled with electrifying lights, dry ice reactions, colored fires, and a big booming finale that all your friends and family can enjoy no matter how old they are

#### **Space Adventure (ages 4-12)**

Come blast off on a space journey with Mad Science! See “shooting stars” through our rainbow lens, explore a dry ice cosmic atmosphere, witness a space volcano, and launch rockets too! This party is out of this world!

#### **Potions Explosions (ages 5-12)**

Step into our Mad Lab where our Mad Scientist has been busy cooking up some Science experiments specially made for your birthday. Discover science secrets and learn about dry ice that helps you make bubbling potions, catch a rainbow in a tube & hear a spoon scream. Enjoy crazy chemical reactions that will explode and crackle, and witness an indoor cloud.

## Winter Wonder Lab (all ages)

Welcome to our frozen castle where everything is powered by science! We will magically make snow appear, taste frozen breath, and pop bubbles the size of snowballs. We will use our science powers to catch a rainbow and conquer a wind vortex! This party will blow you away!

## Bubbles and Burps (ages 3-5)

Explore how cool dry ice really is! Children will witness a whole dry ice experience! Foamy bubble baths, burping flasks, and dry ice showers will bring smiles to the whole crowd. Learn the science behind making your own bubble solution This is one party you will not want to miss!

## It's Not Magic (All ages)

Dive into the mysterious world of magic! Many famous illusions performed by magicians are based 100% on science. See how you can be a great magician by simply using science. The Mad Scientist will perform many of these tricks and explain how IT IS NOT MAGIC, it is SCIENCE!

## Mad Science

### Virtual Birthday Party Add-On Options

(Dropped to your House)

#### **Birthday Child Party Package: \$50**

**Party Package:** Lab coat, goggles, Mad Science poster and Slime making ingredients. Package will be dropped off at your home before the party.

#### **Mad Science Home Experiment Kit: \$8 per child**

##### **Glow Slime Experiment Kit:**

##### **Super Bouncy Balls Experiment Kit:**

\*parents provide: water, 1 drop of liquid soap, and scissors\*
